

Fiber Optix: Recent Work

Virtual Opening - April 18, 2020

Q+A with Janet Steadman

What is your creative space like?

Last year we moved from Washington State to Omaha, NE. I left my studio and yards and yards of fabric. We now live in a Condo and my sewing machine is in a corner of the living room. I am taking care of my 91 year old husband who has Alzheimers so find no time to create.

What artists influence you?

Paul Klee is a favorite of mine. Both Nancy Crow and Michael James influence my work. I studied with each of them for many years.

How are you staying busy during social distancing? Can you recommend any projects to our opening's virtual guests?

Taking care of my husband keeps me busy. I dream that I am back creating and stitching. I have plans for the next quilt.
